DECEMBER 2023

1. Background or Rationale

The traditional rental processes lack a centralized and efficient platform for communication and negotiation between Customers and Businesses. Existing methods often involve time-consuming and fragmented interactions, hindering the quick and convenient acquisition of rental items. Additionally, businesses providing rental services may face challenges in reaching a broader audience and optimizing their operations.

2. The technical problems or the existing problems?

The technical problem to be addressed is the lack a centralized and efficient platform for communication and negotiation between Renters and Businesses. Time Consuming that can cause hassle for customers to find Businesses for renting some items.

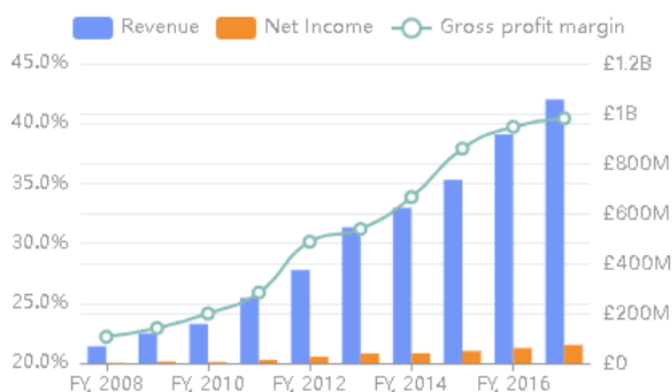

3. What is the existing technology/product in the market and each market shares?

Airbnb - Known for short-term property rentals, Airbnb has a wide user base and global recognition.

- Airbnb generated \$8.3 billion in revenue in 2022, a 40% year-on-year increase
- Airbnb has 200 million users, though that number has not been updated since 2020
- In 2022, 393 million bookings were made on Airbnb, a 31% increase on 2021
- There were 6.6 million listings on Airbnb, run by four million hosts

[Rentalcars.com](https://www.rentalcars.com) - Specialized in vehicle rentals, offering a vast selection of rental options worldwide.

Summary Financials

Revenue (FY, 2017):	£1.1B
Gross profit (FY, 2017):	£426.8M
Net income (FY, 2017):	£72.6M
Cash (FY, 2017):	£55.1M
EBIT (FY, 2017):	£89.6M

TaskRabbit: Provides a platform for various services, including short-term rentals of items and equipment.

 **\$37.7M** Total Funding

 **1423** Number of Employees

 **\$295.1M** Revenue (est)

 **20%** Employee Growth %

 **N/A** Valuation

 **N/A** Accelerator

4. Who will be the beneficiaries (primary and secondary) of the technology/product?

Primary Beneficiaries:

- **Customers:** Individuals or businesses looking for a convenient platform to easily find and rent various items.
- **Middleman/brokers:** Businesses or individuals facilitating rental transactions, expanding their customer base.

Secondary Beneficiaries:

- **Business Owners:** Those offering rental services, gaining increased visibility and access to potential customers.

5. What are the advantages of your product compared to the existing products?

- **Convenience:** The app streamlines the rental process, making it convenient for users to find and negotiate rentals efficiently.
- **Wide Range of Options:** Offering a diverse selection of rental items, catering to different needs.
- **Time Savings:** Efficient negotiation and communication save time for both Renters and Handlers/Agents.
- **Hassle free** – Users can do rent transactions with less effort.
